

HYCOOX

Multi Suction Injector

Capactuel
MEDICAL
Preventive and Restorative Aesthetic

Optimize each injection procedure.

HYCOOX is an automated solution dispensing device that allows significant time savings and better control over the amount of product injected. In addition, the shape of the needles improves the patient experience because the injection is less painful. HYCOOX maximizes usability by making injection depth more accurate. HYCOOX is the most advanced and scalable automated device for successful therapeutic and aesthetic injection procedures in complete safety.

Multiple and varied fields of application.

Face | Body | Hair

Modular handpiece.

Hycoox device has a syringe holder with a plunger system which allows to accommodate different types of syringes with specific heads.

Technical characteristics.

- 3 injection modes : Auto, Manual Shot, Semi Auto.
- 6 types of syringes from 1CC to 10CC (glass and others).
- 8 types of predefined injection procedures + 1 free and customizable program.
- 6 levels of speed that fit to 6 levels of product viscosity.
- 4 levels of suction pressure depending on the type of skin.
- Parameterizable interval between each product injection.

▶ Modular syringe with interchangeable head.

▶ Handpiece with interchangeable syringes.

9 needles head - 32G - 0,8 mm
Recommended use : Face.
9 needles head - 32G - 1,2 mm
Recommended use : Face.

5 needles head - 32G - 2 mm
Recommended use : Hair.
5 needles head - 32G - 3 mm
Recommended use : Double chin.
5 needles head - 32G - 4,5 mm
Recommended use : Body.
